

Support of Turkish Airlines to the Sustainable Development Goals

As part of its sustainability program, Turkish Airlines supports the Sustainable Development Goals (SDGs) announced in 2016 by United Nations member countries with the aim of reaching them by the end of 2030. Sustainable Development Goals, which consist of 17 global goals, were discussed within the scope of Turkish Airlines' materiality study, and SDG5, SDG7, SDG8, SDG9, SDG12, SDG13, SDG16, SDG17 were identified as working areas to be targeted in the future. In addition, considering Turkish Airlines' sphere of influence and the scope of its value chain, it is obvious that the work carried out also contributes to many other SDGs.

Supported SDGs	Sub-Goals	Description
 	1.1 Eradicate extreme poverty 1.4 Equal rights to ownership, basic services, technology and economic resources 2.4 Sustainable food production and resilient agricultural practices	<p>Thanks to the value chain it creates and the socio-economic connection it provides between flight destinations, Turkish Airlines generates direct and indirect economic value in the geographies in which it operates and creates employment for over 60,000 people together with its subsidiaries. Each employment created in the aviation sector is 175% more productive compared to other sectors and creates a greater added value.</p> <p>Turkish Airlines operated flights to 25 of the 46 countries in the United Nations' least developed countries category in 2021. In this context, Turkish Airlines carries the production of underdeveloped or developing countries to target markets, making a positive contribution to their economic development, thus employment and income, while also enabling these countries to improve their social relations with the world.</p> <p>Microalgae-based Sustainable Bio-Jet Fuel Project studies are carried out with R&D projects developed together with universities, and thanks to the developed technique, the use of agricultural lands for the production of sustainable aviation fuels is prevented. Sustainable biofuel will be produced without plant seeds used as food, not competing with agricultural production, and without polluting water, soil and other natural resources.</p>
	3.3 Fight communicable diseases 3.8 Achieve universal health coverage 3.B Support research, development and universal access to affordable vaccines and medicines	<p>With its end-to-end cold chain corridor created on more than 400 different routes, Turkish Cargo plays an active role in the market in transporting vaccines and medicines at appropriate temperatures and conditions. The importance of the vaccine and medical supply chain has emerged in the clearest way under pandemic conditions, and Turkish Airlines undertook an important task with these practices that it continued in 2021.</p> <p>Turkish Airlines' role in the transportation of vaccines and medical supplies is not limited to the pandemic conditions. In several geographies, the transportation of vaccines and medical supplies is also of critical importance during non-pandemic periods. Through flights to several destinations in various geographies, primarily in Africa, Turkish Airlines provides these populations with access to vaccines and medicines by transporting vaccines and medical supplies to these regions.</p>
	4.3 Equal access to affordable technical, vocational and higher education 4.4 Increase the number of people with relevant skills for financial success 4.5 Eliminate all discrimination in education	<p>It is prerequisite for operating in the aviation sector to have a human resource with the highest level of training and professional capacity. With its international competencies, experience and technical infrastructure, Turkish Airlines plays an important role in both the training of its own employees and bringing new professionals to the sector. In this context, Turkish Airlines' support for undergraduate and graduate programs of universities and collaborations established with them, enables employee development, improves sectoral knowledge and increases employment opportunities.</p>

Supported SDGs	Sub-Goals	Description
 	<p>5.1 End discrimination against women and girls</p> <p>5.5 Ensure full participation in leadership and decision-making</p> <p>5.C Adopt and strengthen policies and enforceable legislation for gender equality</p> <p>10.2 Promote universal social, economic and political inclusion</p> <p>10.3 Ensure equal opportunities and end discrimination</p> <p>10.4 Adopt fiscal and social policies that promotes equality</p> <p>10.A Special and differential treatment for developing countries</p>	<p>Diversity and equality are amongst Turkish Airlines' most fundamental corporate values. Equal treatment of all employees in all areas is of primary importance in terms of both human rights and corporate policies. Studies are carried out to ensure that female employees take a balanced place in technical and managerial roles where there is insufficient representation and to improve their career opportunities, and within this scope, partnerships with national and international initiatives are developed. While the participation of disadvantaged individuals in the workforce is supported by fair wages and working conditions, working conditions are facilitated by responsible HR policies.</p> <p>With its end-to-end cold chain corridor created on more than 400 different routes, Turkish Cargo plays an active role in the market in transporting vaccines and medicines at appropriate temperatures and conditions. During the COVID-19 pandemic, Turkish Cargo continued its flights to various developing and underdeveloped countries and maintained their connectivity; and supported these countries experiencing inequalities in access to vaccines and medical supplies.</p>
  	<p>7.2 Increase substantially the share of renewable energy in the global energy mix</p> <p>7.3 Double the global rate of improvement in energy efficiency</p> <p>7.A Supporting access to clean energy research, technology and investments</p> <p>12.2 Achieve the sustainable management and efficient use of natural resources</p> <p>12.4 Responsible chemical and waste management</p> <p>12.5 Substantially reduce waste generation through prevention, reduction, recycling and reuse</p> <p>12.6 Encouraging companies for sustainability practices and sustainability reporting</p> <p>12.8 Promoting a universal sustainable lifestyle approach</p> <p>13.1 Strengthen resilience and adaptive capacity to climate-related hazards and natural disasters</p> <p>13.2 Integrate climate change measures into policies, strategies and planning</p> <p>13.3 Building knowledge and capacity to combat climate change</p>	<p>Turkish Airlines manages the environmental impacts arising from its operations in line with its Sustainability Policy and Environmental Policy, with the awareness of being a Responsible Company. In this context, impacts on the climate and the environment are managed with responsible practices and projections such as responsible procurement, waste management, energy and emission management, and clean energy, and the progress achieved by carrying out performance-enhancing studies is reported.</p> <p>Turkish Airlines carries out its activities to reduce the negative and irreversible effects of the global climate crisis and to minimize climate-related risks. Being fully aware of the impact of the aviation industry on climate change and acting with the awareness of the importance of efforts to reduce its carbon footprint, Turkish Airlines optimizes its flight operations to increase fuel efficiency, invests in new technologies, gives priority to aircraft and engines with high efficiency while including new generation aircrafts to its fleet. At the same time, Incorporation carries out sustainable bio-fuel research and development studies in cooperation with universities in order to reduce the amount of fossil-based aviation fuel use.</p>
	<p>8.1 Sustainable Economic Growth</p> <p>8.3 Promote policies to support job creation and growing enterprises</p> <p>8.5 Full employment and decent work with equal pay</p> <p>8.7 End modern slavery, trafficking, and child labour</p> <p>8.8 Protect labour rights and promote safe working environments</p>	<p>Aiming to generate economic value for its stakeholders with the business model it has developed with the awareness of being a fair employer and a safe operator, Turkish Airlines offers its employees a safe and fair work life that is open for development. Turkish Airlines, which accepts flight safety and security as a fundamental working standard that cannot be compromised under any circumstances, always aims for the highest standards in its operations.</p> <p>Conducting its operations in line with its principle of respecting human rights, Turkish Airlines assures all the rights of its employees with its ethical principles and policies. It provides a working environment where any practices that violate human rights such as modern slavery and forced labor, including human trafficking, cannot be found under the umbrella of the Incorporation.</p>

Supported SDGs	Sub-Goals	Description
	9.4 Upgrade all industries and infrastructures for sustainability	Turkish Airlines, the official flag carrier of the Republic of Türkiye and the airline that flies to most countries and international destinations in the world, has been constantly renewing its fleet since its foundation. With investments in new generation aircrafts, Turkish Airlines aims to expand its flight network while developing its young fleet with an average age of 8.5 years.
	9.5 Enhance research and upgrade industrial technologies	Investing in R&D and innovation, especially in digitalization activities, in order to ensure the endurance of its operations and increase business continuity, Turkish Airlines constantly improves its operating infrastructure. While focusing on solving problems with new generation technology companies thanks to its open innovation strategy, it develops new technologies by managing resource efficiency and carries out cooperation programs to create new opportunities.
	11.2 Affordable and sustainable transport systems	The aviation industry connects cities in various parts of the world, bringing together cultures as well as economic activities. On the other hand, the aviation industry also has impacts on sustainable urban life, especially emissions and noise. In order to minimize these effects, Turkish Airlines continuously improves its operational capability with low emission and noise levels by making fleet modernization investments and contributes to reducing the negative environmental impacts of cities per capita through waste management practices.
	11.5 Reduce the adverse effects of natural disasters	After the disaster, it organizes emergency aid operations by developing cooperation with NGOs and Public Institutions in order to meet the needs of the people of the region affected by the disaster.
	11.6 Reduce the environmental impacts of cities	
	15.3 End desertification and restore degraded land	Turkish Airlines signed the "United for Wildlife Buckingham Palace Declaration" (UFW), supported by IATA, which aims to prevent the illegal trade of wild animals and to raise sectoral awareness on this issue. Thus, it helps to prevent the illegal trade of wild animal parts such as ivory, rhino horns and tortoise shells. On the other hand, while environmentally friendly materials are preferred in the headset and blanket sets we offer to our passengers, the toys offered to our child passengers are produced with "Forest Stewardship Council (FSC)" certified products.
	15.7 Eliminate poaching and trafficking of protected species	
	16.5 Substantially reduce corruption and bribery	
	16.6 Develop effective, accountable and transparent institutions	Turkish Airlines carries out its activities in line with the principles of transparency and accountability, in line with the inclusive, internationally accepted corporate governance and ethical rules that are responsible to its stakeholders.
	16.10 Ensure public access to information and protect fundamental freedoms	
	16.B Promote and enforce non-discriminatory laws and policies	
	17.6 Knowledge sharing and cooperation for access to science, technology and innovation	
	17.11 Increase the exports of developing countries	
	17.14 Enhance policy coherence for sustainable development	Turkish Airlines develops partnerships with various institutions and organizations in line with the 2030 Global Goals and common goals of sustainable development. By taking part in the sustainability initiatives created by international organizations that shape aviation practices, the practices of the Incorporation are developed and contribute to the formation of the international sustainability agenda.
	17.16 Enhance the global partnership for sustainable development	
	17.17 Encourage effective partnerships	
	17.18 Enhance availability of reliable data
